

## SPECIFICATION OF TILE GLUE ADHESIVE

**Product Name:** Technical Information Paste Tile Glue

**Properties:**

Appearance: White Dough/Paste

Density: 1.7 kg/liter

Open Time: More than 20 minutes at a temperature of 23-25°C

Adhesion Strength: 0.5 MPa

Drying Time: 24 hours

**Description:**

Technical Information Paste Tile Glue is a high-quality adhesive specifically formulated for tile applications. Its unique composition ensures excellent adhesion, extended open time, and reliable performance for various tiling projects.

**Physical Characteristics:**

Appearance: White Dough/Paste

Density: 1.7 kg/liter

Odor: Minimal

Consistency: Smooth Paste

**Performance Characteristics:**

Open Time: More than 20 minutes at a temperature of 23-25°C

Adhesion Strength: 0.5 MPa (Megapascal)

Drying Time: 24 hours

**Application:**

Technical Information Paste Tile Glue is suitable for a wide range of tile installations, including ceramic, porcelain, and natural stone. It is designed for both indoor and outdoor use, providing a strong and lasting bond.

**Usage Instructions:**

Ensure that the surfaces to be tiled are clean, dry, and free from any contaminants.

Apply the paste tile glue evenly on the substrate using an appropriate trowel.

Press the tiles firmly into the adhesive, ensuring full coverage on the back of each tile.

Adjust tile alignment as needed within the open time.

Allow a minimum of 24 hours for complete drying and curing.

**Handling and Storage:**

Storage Temperature: Store in a cool, dry place.

Handling Precautions: Avoid inhalation and direct contact with eyes and skin. Use suitable personal protective equipment (PPE) during handling.
