

Specification of Drilling Starch

Properties	Requirement
Modification and base	Modified potato starch
Appearance	Free flooring granular white
Compatibility	All drilling fluids
Solubility/dispersibilty	Readily without lump forming excellent responsibility
Bulk density	650-700 gr/l
Particle size	<2000 micron
Application	Fluid loss reduction for all types of drilling fluids
Rate of addition	10-30 kg/m ³ (4-11 ppb)
Storage	Store dry for 12 months
Packing	25 kg or 50 lbs net paper bags or any type of request
