

Specification of Powder Adhesive

Product Name: Adhesive Powder

Properties:

Specific Gravity: $1.50 \pm 0.02 \text{ g/cm}^3$

Appearance: Powder

Ion Chlorine: None

Description:

The Adhesive Powder is a high-quality, chlorine-free adhesive with a specific gravity of $1.50 \pm 0.02 \text{ g/cm}^3$. It is a fine powder known for its excellent bonding properties and versatile applications.

Physical Characteristics:

Specific Gravity: $1.50 \pm 0.02 \text{ g/cm}^3$

Color: White

Odor: Odorless

Form: Powder

Chemical Composition:

Chlorine Content: None

Application:

The Adhesive Powder is designed for various bonding applications where a reliable and strong adhesive is required. It is suitable for use in industries such as manufacturing, construction, and electronics.

Handling and Storage:

Storage Temperature: Store in a cool, dry place.

Handling Precautions: Avoid inhalation and contact with eyes and skin. Use appropriate personal protective equipment (PPE) during handling.

Quality Control:

Each batch is tested for specific gravity to ensure consistency.

Chlorine content is verified to meet the specified criteria of no ion chlorine.

Packaging:

The Adhesive Powder is available in secure, airtight packaging to prevent moisture absorption and maintain product integrity. Packaging options include bags, drums, or as per customer requirements.
